

RANGER™ ALL Comers SFA Registry¹

Study Design Prospective Multicenter all-comer registry, planned enrollment 180 patients
N=172, average lesion length 129 mm

Patient Characteristics

129 mm
Average lesion length

35%
Diabetes

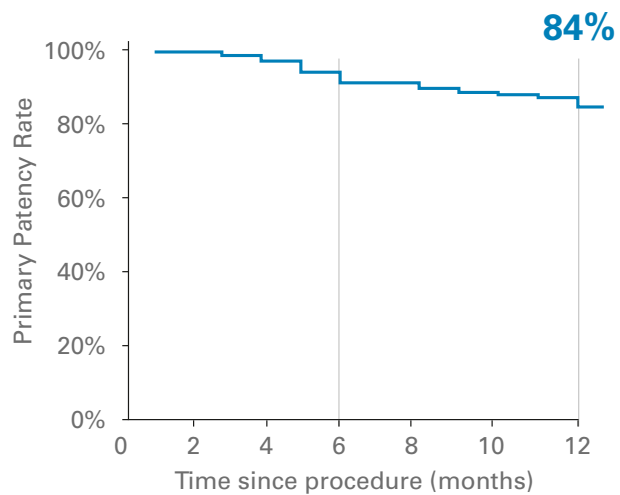

78%
Rutherford Class III & higher

48%
TASC C&D lesions

Safety & Efficacy Results at 12 months

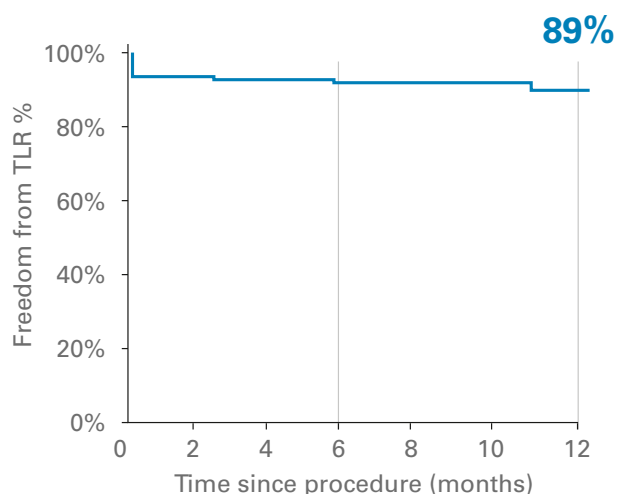

Patency

Ranger achieved **84%**²
primary patency at 12 months

Freedom from TLR

Ranger achieved **89%**²
freedom from TLR at 12 months
