ONCOZENE™ Microspheres

SIZED FOR SUCCESS

More control and confidence in your embolization procedures with the most precisely calibrated microspheres.
ONCOZENE™ Microspheres

ONCOZENE Microspheres offer:

- Controlled embolization with precisely calibrated microspheres
- Strength in Numbers: Precisely calibrated microspheres designed to deliver more microspheres per ml
- Sized for tumor penetration with unique microspheres sizes: 40µm, 75µm, 100µm
- High confidence when performing super selective and targeted embolization procedures as 95% of the microspheres are within the stated size variance
- Greater flexibility with single sale units in 2 ml and 3 ml sized syringes

INDICATIONS FOR USE: ONCOZENE™ Microspheres are indicated for the embolization of arteriovenous malformations and hypervascular tumors including hepatoma. CONTRAINDICATIONS: The contraindications of ONCOZENE™ Microspheres include the presence of vasculature where ONCOZENE™ Microspheres could pass directly into the central nervous system, central circulatory system, internal carotid artery, or other non-target territories. Procedures should not be performed if vascular anatomy precludes correct catheter placement or embolic injection. WARNINGS AND PRECAUTIONS: Vascular embolization is a high-risk procedure. The procedure should be performed by specialized physicians trained in vascular embolization procedures. Complications can occur at any time during or after the procedure. CAUTION: Federal (USA) law restricts this device to sale by or on the order of a physician.

A complete list of indications, contraindications, warnings and precautions are described in ONCOZENE™ Microspheres Instructions for Use. Please consult these before using the product.
